

STACKED SHELF SYSTEM

FURNITURE / LIGHTING / ACCESSORIES

PRODUCT FACT SHEET

JULIEN DE SMEDT ARCHITECTS ON THE DESIGN "How to be specific and generic altogether? Shelving systems have a tendency to achieve one concern but never both. We decided to dimension shelving units based on the generic measurements of things to store and display while allowing for them to be combined according to specific needs and desires. The result can be at times a random stack of boxes or a coordinated grid of efficient storage... or both!"

PROCESS

White, light grey and dark grey cubes: Every side is cut out of MDF, then assembled, glued together and painted with three layers of PU lacquer. Ash cubes: Every side is cut out of MDF with ash veneer, then assembled and glued together.

DESIGNED BY / YEAR OF DESIGN

JDS Architects / 2008

TYPE

Stackable shelf system, with or without backboard/coloured backboard

DESCRIPTION

The Stacked system by JDS Architects provides a storage solution with infinite potential. Using small clips you can arrange the generic building blocks as you see fit to quickly create shelf systems, room dividers or side tables.

ENVIRONMENT

Indoor / Free standing or wall mounted

MATERIAL

Stacked cubes: PU lacquered MDF or ash veneer
Stacked clips: Powder coated steel

CLEANING INSTRUCTIONS

Remove dust from shelves with a soft cloth. When necessary clean with moist cloth. For wood veneer finishes, dry immediately with a soft cloth following wood grains. The wood should not be exposed to excessive heat, direct sunlight or humidity.

TESTS & CERTIFICATION

Danish Technological Institute: Tested according to: EN 14749:2005 Domestic and kitchen storage units and worktops - Safety requirements and test methods. Clauses 6.3.2, 6.3.8.2. ISO 7170:2005 Furniture - Storage units - Determination of strength and durability. Loading according to ISO 7170:2005, test level 2. Clauses 6.2.1.

WEIGHT & HEIGHT LIMITS

Max. weight 25 kg per box
Max. 6 boxes on top of each other
Max. 12 kg if mounted on wall.

ABOUT THE DESIGNER

Copenhagen-based Julien De Smedt is the co-founder of PLOT and an internationally acclaimed architect. He is recognized for his ability to always take a fresh look at things. His works challenge conventions and many have been awarded.
