

HISTORY

One of the very first models Hans J. Wegner designed especially for Carl Hansen & Son in 1949.

Produced for the first time in 1950 and has been produced continuously ever since.

As Hans J. Wegner's most popular chair for Carl Hansen & Son, the CH24 enjoys worldwide recognition.

DESCRIPTION

An excellent example of Hans J. Wegner's constant strive towards achieving organic simplicity, comfort and stability in his designs.

The last of a series of chairs Hans J. Wegner designed with great inspiration from ancient Chinese armchairs.

The characteristic "Y" provides comfortable back support and stability to the steam-bent top, and also inspires the chair's names, "The Y-Chair" or "The Wishbone Chair".

The gently rounded top, the light Y-construction and the hand woven paper cord seat offers a variety of comfortable seating positions making the CH24 ideal as a dining and lounge chair.

The CH24 is both a very stable and also very light chair making it easy to move around the room enabling great flexibility.

It takes a skilled craftsman about 1 hour to weave the seat with approximately 120 m of paper cord. The impressive durability of the paper cord makes the chair strong and long-lasting.

It takes more than 100 manual operations to manufacture each CH24.

It is made from solid hardwood and paper cord.

ENVIRONMENTAL INFORMATION

Carl Hansen & Søn and sustainability

People's fascination of the combination of good design and wood, as well as other natural materials, is something that transcends time and fashion. At Carl Hansen & Søn, we believe that this fascination helps to explain the great interest in our furniture, and we take very seriously concerns about the sustainability of the natural resources upon which we depend for our products. That is why we strive every day to improve our production methods, logistics and sales efforts in respect of scarce natural resources.

We buy wood only from sustainably managed forests. Oak, beech and ash come primarily from Danish forests which are managed according to the principles described in Denmark's National Forest Programme; some of these wood types are also sourced from other similarly managed European forests, or, in the case of walnut and cherry, North American forests.

We use every possible bit of these fine hardwoods in our furniture production.

Hans J. Wegner was born in 1914 in Tønder, the son of a shoemaker. At the age of 17 he was apprenticed to a carpenter (H. F. Stahlberg) and it was at this time that he developed his first design. At the age of 20 he moved to Copenhagen to study at the institution now known as The Royal Danish Academy of Fine Arts, School of Design but which back then went under the more modest title of "The Artisan College."

He studied there from 1936-1938, before taking further studies as an architect. In 1940 Wegner initiated a joint project with Arne Jacobsen and Erik Møller in Aarhus, which involved fitting out Aarhus' town hall. It was also in 1940 that Wegner began to work with Master Carpenter Johannes Hansen, a man who played a significant role in bringing modern design to the Danish public. The then Copenhagen Industrial Art Museum (now Design Museum Denmark) purchased their first Wegner chair in 1942. Hans J. Wegner opened his own design studio in 1943, and in 1944 he designed his first "China Chair" in a series inspired by the Chinese Emperor's thrones.

One of the chairs in this series is what is probably Wegner's most famous work "The Wishbone Chair," which he designed in 1949, and which Carl Hansen & Søn have manufactured since 1950. Hans J. Wegner is regarded as one of the world's outstanding furniture designers. He was one of the motive forces behind the Danish Modern movement which did much to change people's view of furniture in the 1950s and 60s. His design retain relevance for us today and his sense for details is a source of constant wonder.

Wegner has received a number of prizes and recognitions. Amongst other things, he is an honorary member of The Royal Danish Academy of Fine Arts and has received an honorary doctorate from the Royal College of Art in London. He was also the first ever recipient of the Lunning Prize and received the 8th International Design Award in Osaka, Japan. His works are exhibited at major international museums including The Museum of Modern Art (MoMA) in New York and Die Neue Sammlung in Munich.

Hans J. Wegner died in Denmark in January 2007

Hans J. Wegner's contributions to Danish design:

- A master carpenter first and a designer second: Perfectly finished joints and exquisite forms.
- A deep respect for the wood and its character and an everlasting curiosity about good materials.
- He gave minimalism an organic and natural softness.
- He is considered as "the master chair-maker" and designed more than 500 chairs during the course of his life.

VARIANTS CHOICES AND DIMENSIONS

Inevitably, however, there are some scraps, which are then used to produce other products or recycled in district heating plants.
